

Yen-Chia Hsu

許晏嘉

Project Scientist
CREATE Lab, Robotics Institute
Carnegie Mellon University, Pittsburgh, USA

yenchia (at) cs.cmu.edu
hsu.yenchia (at) gmail.com
<http://yenchiah.me/>

Research Interests

Interactive system design and deployment, human-centered artificial intelligence, community citizen science, human-computer interaction, applied machine learning, computer vision, crowdsourcing, participatory sensing, information visualization, civic engagement, sustainability, community empowerment, data science, cyber-physical system, smart city, social justice, environmental health, urban science, interactive architecture.

Experiences

- **CREATE Lab, Robotics Institute, School of Computer Science, Carnegie Mellon University, USA**
Project Scientist, 12/2018 - present
Senior Research Programmer/Analyst, 08/2018 - 11/2018
Ph.D. Student Researcher, 09/2014 - 07/2018
Web Designer/Developer, 10/2013 - 06/2014
Research Associate, 01/2013 - 07/2013
- **Code Lab, School of Architecture, Carnegie Mellon University, USA**
Master's Student, 09/2011 - 12/2012
Lab Assistant, 09/2011 - 05/2012
- **IA Lab, Department of Architecture, National Cheng Kung University, Taiwan**
Research Assistant, 09/2010 - 06/2011
- **Department of Architecture, National Cheng Kung University, Taiwan**
General Coordinator, Graduation Design Preparation Committee, 09/2008 - 06/2009
Director of General Affairs, Student Committee, 09/2007 - 06/2008

Education

- **Ph.D. in Robotics**, 08/2014 - 08/2018
Carnegie Mellon University, Pittsburgh, USA
Thesis Title: Designing Interactive Systems for Community Citizen Science
Committee: Illah Nourbakhsh (advisor), Aaron Steinfeld, Jeffrey Bigham, and Eric Paulos
CeDiploma ID: 185C-4146-Y9U9 (can be validated from the link below)
<https://www.cmu.edu/hub/registrar/graduation/diplomas/electronic/validation/index.html>
- **Master of Tangible Interaction Design**, 08/2011 - 12/2012
Carnegie Mellon University, Pittsburgh, USA
- **Dual B.S. in Architecture and in Computer Science**, 08/2005 - 05/2010
National Cheng Kung University, Tainan, Taiwan

Awards and Honors

- [A6] Best Paper Honorable Mention Award (Top 2.5%, 7 out of 282 submissions). 2019. ACM IUI Conference on Intelligent User Interfaces, USA. <https://dl.acm.org/citation.cfm?id=3302293>
- [A5] Best Paper Honorable Mention Award (Top 5%). 2017. ACM CHI Conference on Human Factors in Computing Systems, USA. <https://dl.acm.org/citation.cfm?id=3025853>
- [A4] Webby People's Voice Award, Best Use of Video or Moving Image. 2014. International Academy of Digital Arts and Sciences, USA. <https://www.webbyawards.com/winners/2014/web/website-features-and-design/best-use-of-video-or-moving-image/timelapse/>
- [A3] Best New Artist. 2009. The National Golden Award for Architecture, Taiwan. http://www.yestaiwan.com.tw/page06_5.html
- [A2] Third Prize, National Country House Design Competition. 2008. Ministry of the Interior, Taiwan.
- [A1] Outstanding Student Academic Achievement. 2005, 2006, 2007. Department of Architecture, National Cheng Kung University, Taiwan.

Grants and Other Support

- [G1] Nvidia GPU Grant (accepted), GeForce Titan Xp, 2018
A Deep Learning Tool for Smoke Detection

Projects

RISE Video Dataset: Recognizing Industrial Smoke Emissions [O5, T13], 2018 - 2020

I am developing a system that invites citizens to label videos with industrial smoke emissions. As we gather more labels, they will be used to train a deep neural network for smoke detection, and we will design visualization for industrial pollution events. (<https://smoke.createlab.org/>)

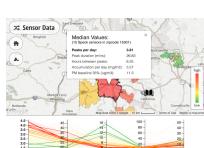

A Tool for Creating Interactive Stories on the EarthTime Timelapse [T10], 2018

I worked in a team to develop a web-based tool that enables users to create, edit, and share stories about nature changes and human impact on EarthTime, visualizing the transformation of the EarthTime over three decades with images and datasets. (<https://earthtime.org>)

Community-Empowered Mobile Smell Reporting System [C4, F2, T9, A6], 2017 - 2018

I worked in a team to develop Smell Pittsburgh, a mobile application for citizens to report pollution odors to regulators. A map visualizes the reports with air quality and wind data. A machine learning model predicts odors and sends push notifications. (<http://smellpgh.org>)

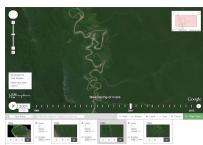

Visualization Tool for Environmental Sensing and Public Health Data [P2, T5, T8], 2017

I worked in a team to develop the Environmental Health Channel, an interactive web-based tool for visualizing health symptoms, particulate measurements, and personal stories from residents who are affected by oil and gas drilling development. (<http://envhealthchannel.org>)

Community-Empowered Air Quality Monitoring System [C3, F3, A5], 2015 - 2016

I worked with a community to develop an air quality monitoring system that integrates live camera data, sensing data, and smell reports. The system uses computer vision to generate videos with smoke emissions, which serve as evidence of pollution for community advocacy.

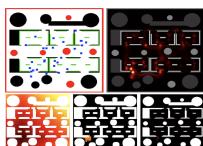

A Web-based Large-scale Timelapse Editor for Interactive Storytelling [P1, T7], 2014

Based on the timelapse viewer, I developed a tool for users to create interactive slideshows or guided tours. Users can embed or share the slideshows or tours on social media for telling interactive stories. (<http://timemachine.cmucreatelab.org/wiki/EarthEngineTourEditor>)

Earth Timelapse Viewer Visualizing Landsat Satellite Imagery [F1, T7, A4], 2013

I worked in a team to develop an Earth timelapse viewer, consisting of cloud-free mosaics of the planet with billions of pixels for decades. The interactive viewer was released with Google and TIME. (<https://earthengine.google.com/timelapse/>, <http://world.time.com/timelapse/>)

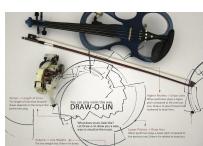

SimArch: A Multi-Agent System for Human Path Simulation [O2, T2], 2012

SimArch uses Markov Decision Process to build a behavior model. The model simulates mental states, target range detection, and collision prediction when agents behave in a museum. SimArch outputs the prediction of how likely a person will occur in a location after simulation.

SENSEable Shoes: Hands-Free and Eyes-Free Mobile Interaction [T3], 2012

SENSEable Shoes is a platform for interaction designers to create applications. It recognizes low-level activities by measuring the weight distribution over the feet with sensors in the shoe pad. A Support Vector Machine classifier identifies mobile activities and foot gestures.

Draw-o-lin: A Music Visualizer for Violin, 2011

What does music look like? Draw-o-lin is an interactive mobile robot visualizing music by drawing graphs on a paper according to various sound properties. Violin performers control the robot by playing various pitches, alternating the volume, and changing the tempo.

SynTag: A Web-Based Platform for Labeling Real-time Video [C2, C1, T1], 2010

Users can label Good, Question, and Disagree tags in real or non-real time with visualization of time-stamp video previews on an interactive timeline. SynTag creates thumbnails by using real-time tags for presenters to receive instant feedback and for others to retrieve videos.

Professional Activities

- Program Committee/Reviewer

ACM Conference on Computer-Supported Cooperative Work (CSCW), 2019 - 2020

ACM Conference on Human Factors in Computing Systems (CHI), 2019 - 2020

ACM Conference on Designing Interactive Systems (DIS), 2019

Journal of Environmental Planning and Management, 2020

Pattern Analysis and Applications Journal, 2019

Taiwan Association of Computer-Human Interaction (TAICHI), 2017 - 2019

IEEE Robotics and Automation Magazine, 2015

- **Conference Presenter**

- ACM Conference on Intelligent User Interfaces (IUI), 2019
- ACM Conference on Designing Interactive Systems (DIS), 2018
- ACM Conference on Human Factors in Computing Systems (CHI), 2017
- Air and Waste Management Association (A&WMA), 2017
- ACM Conference on Computer-Supported Cooperative Work (CSCW), 2012

Invited Talks

- Designing Interactive Systems for Community Citizen Science
Faculty of Information (iSchool), University of Toronto, Ontario, Canada, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Systems and Computer Engineering, Carleton University, Ontario, Canada, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Computer Science, Washington University in St. Louis, MO, USA, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Computer Science, Rensselaer Polytechnic Institute, NY, USA, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Computer Science, William & Mary, VA, USA, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Human Centered Design and Engineering, University of Washington, WA, USA, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Computer Science, University of Texas at Dallas, TX, USA, 2020
- Designing Interactive Systems for Community Citizen Science
School of Information Studies, Syracuse University, NY, USA, 2020
- Designing Interactive Systems for Community Citizen Science
Department of Computer Science, University of Illinois at Chicago, IL, USA, 2020
- Principles and Engineering Applications of AI (18-662)
Department of Electrical and Computer Engineering, Carnegie Mellon University, PA, USA, 2020
- EPA Region III MARAMA Air Quality Monitoring Training Workshop
Swarthmore, PA, USA, 2019
- Creative AI (10-737)
Department of Machine Learning, Carnegie Mellon University, PA, USA, 2019
- Seminar
Sustainability Salon, Local Community Meeting, Pittsburgh, PA, USA, 2019
- Health and Environment In Pittsburgh (ANTH 1727-1010)
Department of Anthropology, University of Pittsburgh, PA, USA, 2019
- Seminar
Breathe Collaborative Community Meeting, Pittsburgh, PA, USA, 2019

- Crowdsourcing & Crowd-AI Systems (IST 597)
College of Information Sciences and Technology, Pennsylvania State University, PA, USA, 2019
- Smart Cities (ARCH7124)
Department of Architecture, National Cheng Kung University, Taiwan, 2019
- Undergraduate Seminar (ANTH 1750-1270)
Department of Anthropology, University of Pittsburgh, PA, USA, 2018
- Seminar
Department of Architecture, National Cheng Kung University, Taiwan, 2018
- Seminar
Department of Industrial Design, National Cheng Kung University, Taiwan, 2018
- Special Topics: Crowd Computing (05-899)
Human-Computer Interaction Institute, Carnegie Mellon University, PA, USA, 2017
- Seminar
Sustainability Salon, Local Community Meeting, Pittsburgh, PA, USA, 2017
- Geo For Good User Summit
Google Earth Engine, Mountain View, CA, USA, 2013

Teaching

- **Robotics Institute, School of Computer Science, Carnegie Mellon University, USA**
Teaching Assistant of 16-811 Math Fundamentals for Robotics, Fall 2015
- **Department of Architecture, National Cheng Kung University, Taiwan**
Teaching Assistant of Living Labs Workshop, Fall 2009

Mentoring

- **Robotics Institute, School of Computer Science, Carnegie Mellon University, USA**
Undergraduate Intern (Sean Prendi), 2018 - 2019

(Last updated: June 30, 2020)
